

# Rain Harvesting™

wireless tank gauge

## Monitoring Rainwater from within the Home or Office

- Simple set up
- Transmits a signal wirelessly to the receiver up to 328 ft / 100 metres away
- Measures the cistern/tank level utilising a reliable solid float system that does not rely on ultra - sonic beams - will not interfere or snag on any internal components
- Easy read dial with "Empty" and "Full" indicators
- Suitable for all vented cisterns/tanks up to 9.8 ft / 3 metres tall (includes underground tanks)
- FCC ID - PS4TAWG01

Code	Description	Barcode
